ORGANIZATION ASSIGNMENT LIST (ICS 203)

1. Incident Name: DETWILER		2. Operational Period: Date From: 7/26/2017 Date To: 7/27/2017 Time From: 0700 Time To: 0700	
3. Incident Commander(s) and Command Staff:		7. Operation Section:	
IC/UC's	T. Derum / S. Beach (T) / G. Pemberton (T)	Chief	Bill Weiser / Steven Ward (T)
Deputy	Dave Russell	Deputy	Mark Brown / Shane Lauderdale
Safety Officer	J. Piccinni / J. Segura / D. Ferro	Night Ops	Mark Higgins
Information Officer	Steve Kaufmann / Koby Johns		
Liaison Officer	Shannon Barney (T)		
Deputy Liaison Officers	G. Haines (EOC) / D. Schloss (Mariposa)	Branch	I/II/III/VI Dennis King (12hr)
4. Agency/Organization Representatives:		Division/Group	W/X/Y/Z/A/B Brad Rushing
Agency/Organization	Name	Division/Group	C/D/E/F Robert Gaylor / Brian Nichols (T)
BLM	Van Arroyo	Division/Group	O/Q/T/U Elliot Maiorana / Billy Alcorn (T)
Mariposa County SO	Doug Binnewies	Division/Group	
CDCR	Chris Dean	Division/Group	
Mariposa County Fire	Gary Hampy	Division/Group	
MMU	Nancy Koerperich	Branch	IV Sean Dakin / Joshua Bischof (T)
OES	David Stone / Corey Zander / Bill Bondshu	Division/Group	AA/BB Craig Covey / Nathan Arellano (T)
Sierra NF	John Goss	Division/Group	GG D. McMillen / R. Garcia (T) / C. Matthews (T) (12hr)
Stanislaus NF	Dave Updike	Division/Group	HH Jonathan Beery / Robert Szczepanek (T)
PG&E	Kevin Smith	Division/Group	Heavy Equipment Nathan Gorham
CCC	Aaron Bayhon	Branch	V Vincent Oneal
		Division/Group	G Darus Ane / Stanley Brawer (T)
		Division/Group	M Darren Bakken / Scot Alderete
		Division/Group	
5. Planning Section:		Branch	VII Tod Patten
Chief	Chris Burch / Mike Petro	Division/Group	MM Keith Swope / Richard Bohn (T)
Deputy	Mike Mills / Chris Carrera (T)	Division/Group	OO Keith Cummings
Resource Unit	J. Pangburn / J. Irving / C. Dyche (T)	Division/Group	
Situation Unit	Eric Scovel / D. Guiliani / D. O'Neil (T)	Branch	Contingency Geoff Money (12hr)
Documentation Unit	Heather Simon	Division/Group	Wagner Peter Kelly (12hr)
Demobilization Unit	Chris Lynch / Nels Jensen Jr.	Division/Group	Ferguson Justin Gagnon (12hr) / Mark Smith (12hr)
GISS	S. Stanish / M. Turner / A. Lau	Branch	Supp Repair Len Nielson (12hr)
FBAN	Tim Chavez / Geoff Marshall (T)	Division/Group	North Peter Leuzinger (12hr)
IMET	Tom Wright	Division/Group	South Joseph Fazio (12hr)
Training Tech Spec	Jon White (T)	Branch	
Hired Equipment Tech	Timothy Bingham / Zach Lunsford (Sims)	Staging Area	Mariposa Spencer Mallinger (12)
Crew Tech Spec	Justin Schmollinger	Staging Area	Horseshoe Jason Emery (12hr)
6. Logistics Section		Air Operations Branch	
Chief	Bob Wood	Air Ops Branch Director Mark Gradek	
Deputy	Dusty Martin	Air Support Grp Sup Greg Bradshaw	
Facilities Unit	Shawn Burris / Maggi Koulfeld (T)	Helibase Manager Tim Perkins / Kenny Dossey(T)	
8. Finance/Administration Section:			
Ground Support Unit	Pete Mock	Chief	Pete Peisch / David Irion (T)
Communications Unit	Austin Browne	Deputy	George Huang
Medical Unit	Darin Nelson	Procurement Unit	Joe Flagg
Supply Unit	Matt Brandt	Comp/Claims Unit	Karen Guillemin / Sean Bowe (T)
Motel Tech Spec	Jacob Tomsich	Cost Unit	Rob Jenkins
Ordering Manager	Scott Burnham	Time Unit	Leslie Drexel / Shane Beck (T)

6. Work Assignments:
 Construct control lines as direct as possible, prepare for firing
 Improve and hold lines along ponderosa fuel breaks.
 Backhaul trash Garbage and Hose

7. Special Instructions:
 Communications issues exist throughout the fire area. Mobile repeaters have been ordered but human repeaters and regular radio checks or PAR's are recommended. Water source will be the hydrant at Mariposa High School on 8th St.

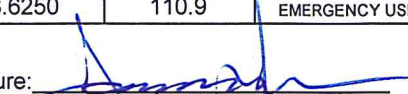

8. Communications (radio and/or phone contact numbers needed for this assignment):

Fire Weather Forecast

FORECAST NO: 8
PREDICTION FOR: Wednesday
SHIFT DATE: July 26, 2017
FORECAST ISSUED: 1900, July 25, 2017

NAME OF FIRE:
UNIT:
Incident Meteorologist:

Detwiler
Madera-Mariposa-Merced
Tom Wright (240-778-5304)

DISCUSSION: It will start to warm up again on Wednesday. Isolated thunderstorms are expected to the east of the fire over the Sierra Nevada again Wednesday afternoon, and while these storms are not expected to move near the fire, gusty outflow winds from the east remain a remote possibility. The wind regime will be slope driven through the morning then switch to west-northwest in the afternoon.

WEDNESDAY:

- **WEATHER:** Mostly sunny. Isolated thunderstorm buildups visible to the east of the fire.
- **WIND (20 FT):**
 - Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-4 mph through 1400, then west-southwest 3-5 mph.
 - On the ridges and exposed areas: southwest 3-5 mph through 1400 hrs, then west 4-8 mph with gusts to 12 mph.
- **MAX TEMPERATURES:** 92-98
- **MIN RH:** 17-25%
- **CHANCE RAIN:** 0% **LAL:** 1
- **INVERSION:** Mid-slope, breaking by 1000 hrs.
- **MIXING HEIGHT:** Near mid-slope in the morning, then rising to 7500 ft after 1000 hrs.
- **TRANSPORT WINDS:** northeast around 5 mph through 1000 hrs then becoming west-southwest 10-20 mph.

WEDNESDAY NIGHT:

- **WEATHER:** Mostly clear.
- **WIND (20 FT):** Becoming downslope 1-3 mph after 2200. Above the inversion: Northeast around 5 mph.
- **MIN TEMPERATURES:** 64 Valleys to 72 Ridges
- **MAX RH:** 30-40% Ridges to 45-55% Valleys
- **CHANCE RAIN:** 0% **LAL:** 1
- **INVERSION:** Mid-slope developing after 2200

THURSDAY:

- **WEATHER:** Mostly sunny.
- **WIND (20 FT):**
 - Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph through 1400, then west-northwest 4-8 mph.
 - On the ridges and exposed areas: north 3-6 mph through 1200, then becoming west-northwest 5-10 mph.
- **MAX TEMPERATURES:** 96-102
- **MIN RH:** 17-25%
- **CHANCE RAIN:** 0% **LAL:** 1
- **INVERSION:** Mid-slope, breaking by 1000 hrs.
- **MIXING HEIGHT:** Near mid-slope in the morning, then rising to 7500 ft after 1000 hrs.
- **TRANSPORT WINDS:** northeast around 5 mph through 1000 hrs then becoming west-northwest 10-20 mph.

3-5 Day Planning Outlook:

Friday: Mostly clear. Lows 68-74. Max RH: 30-40%. Highs 98-105. Min RH: 15-20%. Winds WNW 5-15 mph.
Saturday: Mostly clear. Lows 68-74. Max RH: 30-40%. Highs 98-105. Min RH: 15-20%. Winds WNW 5-15 mph.
Sunday: Mostly clear. Lows 68-74. Max RH: 30-40%. Highs 100-106. Min RH: 15-20%. Winds WNW 5-15 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 8	TYPE OF FIRE Surface
FIRE NAME Detwiler	OPERATIONAL PERIOD July 26, 2017 24 HOUR
DATE ISSUED July 25, 2017	TIME ISSUED 2000 HOURS
UNIT: CALFIRE Madera-Mariposa-Merced	SIGNED  Geoff Marshall FBAN-t

INPUTS

Weather Summary: Hot and dry. Very persistent conditions. Possible thunderstorms East of the fire over the Sierras. See Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL

The fire is primarily burning in scrub oak, pockets of replanted pine/fir, and brush. If fire continues to the North it will get into pockets of tree mortality. These areas will create additional spotting issues and a large dead and down component ready for consumption. We are in a persistent forecast and should see burning conditions similar to the last few days. We have seen a general slowdown in activity due to a reduction of fine dead fuels in the North and North-East sides of the fire and the brush needing fine dead fuels, or pre-heating to make a run. Fire behavior can be expected to change dramatically in a very short period of time once the brush has been pre-heated. Potential for spot fires remains very high. Out flows from possible thunder storms along the eastern Sierras may dramatically increase fire behavior and change direction of the fire.

Optimal Alignment, Peak Burning Conditions

Probability of Ignition = 80-100%

Spotting Distance= up to 1/4 Mi.

ROS 2 - 2.5 mph in brush

Fine Dead Fuel Moisture = 2%

10hr Fuels= 4-5%

Flame Lengths 25 feet plus in brush

SPECIFIC

BRANCH I, II, III, VI

No fire progression is expected. Spot fires outside the line have potential for rapid growth. Dust whirls have high potential to carry embers over the line.

BRANCH IV

Terrain is very steep, areas of the fire burned mosaic and the area has fuels that may have over 90 years of accumulation.

BRANCH V

Little to no progression is expected. Fire is burning into the old Telegraph scar and vegetation is considerably lighter. Small isolated interior runs are possible. Out flows from possible thunderstorms east over the sierras may cause a pronounced increase in fire behavior and a change in direction following major drainages.

BRANCH VII

Fire is working North in the Texas Hill Road area. The fire is mostly terrain driven and following diurnal winds. If the fire spots across Horn Gulch/Texas Hill Road, a run like the one that happened on 7/24 would not be unexpected. Out flows from possible thunderstorms east over the Sierras may cause a pronounced increase in fire behavior and a change in direction following major drainages

AIR OPERATIONS

Watch for outflows from possible thunder storms over the Eastern Sierras. Smoke should not be an issue in the morning
Sunrise 0557
Sunset 2015

SAFETY

QR Code for Tree Mortality Map in Madera – Mariposa – Merced Unit

Do not let your situational awareness go slack. Spot fires and slop-overs should be actively watched for. POST LOOK OUTS

SAFETY MESSAGE

DETWILER

17-CA-MMU-014474 JULY 26, 2017 0700-0700

HAZARD TREES

TREES ARE DROUGHT STRESSED, BEATLE IMPACTED AND FIRE DAMAGED

Watch Out

- Ground cover has burned loosening the stability of the root system
- We have Divisions and Branches is within the tree mortality area
- Large oak and Conifers trees are drought stressed and unstable

Mitigation

- Provide for a Hazard Assessment: Remove the hazard if safe to do so
- Flag and report the hazard to personnel
- Brief your crews on the danger of working and driving in hazard area

INCIDENT HEALTH

FATIGUE DECREASES YOUR BODIES DEFENSES AGAINST ILLNESS

Watch Out

- Poor personal hygiene can lead to rashes and severe discomfort
- Contaminated / Soiled Personal Protective Equipment and clothing
- Watch out for stockpiling old lunches or other debris in packs or vehicles

Mitigation

- Take time to use the provided shower facilities, wash your hands before eating and utilize hand sanitizer throughout the day
- Use the laundry services to clean soiled and contaminated PPE and clothing
- Police your work areas and trailers, dispose of old food/lunches to deter ant and rodents

DEMOB

PREVENT ACCIDENTS DURING DEMOBILIZATION

Watch Out

- Vehicles will be moving in tight areas around Ground Support personnel
- There will be an increase in backing and maneuvering of vehicles in tight spots
- Crews may be in a hurry to leave the incident due to reassignment

Mitigation

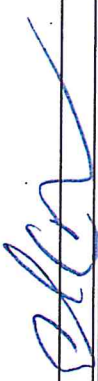

- Provide back-up and spotter personnel - more than one may be required
- Drive cautiously / courteous in and around ICP and demob pedestrian traffic
- Drive safely and monitor fatigue when traveling to home unit or new incident

DETWILER INFORMATION

844-668-3473 / 844-MMU-FIRE
Media Line 562-619-7467

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

MAIL SERVICE

The Information staff will assist you in receiving letters and packages.

Mailing address for Detwiler Fire personnel to have mail sent to:

DEMOB

DETWILER INCIDENT
CA-MMU-014474

- RESOURCES MUST CHECK-IN PRIOR TO THE DEMOB PROCESS.
- TO BE DEEMED EXCESS, SUPERVISORS MUST SUBMIT AN ICS #213 TO THE RESOURCES UNIT.
- RESOURCES REPORT TO DEMOB AT THE TIMES POSTED ON THE TENTATIVE DEMOB LIST, WHICH IS POSTED AROUND THE INCIDENT BASE, AND ON THE QR CODE.
- PRIOR TO REPORTING TO DEMOB, PLEASE RETURN ALL SUPPLIES AND EQUIPMENT.
- RESOURCES WILL GET SIGNATURES FROM THE FOLLOWING UNITS:
 - GROUND SUPPORT (ALL RENTAL VEHICLES WILL BE INSPECTED)
 - TIME
 - TRAINING (IF THEY HAVE A TRAINEE)

RETURN TO DEMOB WITH YOUR ICS 221
THE REMAINING UNITS WILL BE SIGNED OUT VIA RADIO.

- MOTELS
- SUPPLY
- COMMUNICATIONS
- DOCUMENTATION

"Detwiler" CAMMU 014474 Incident Fireline Suppression Repair Plan

I. Objectives

The objective of the Suppression Repair Plan is to mitigate possible adverse effects to resources resulting from fire suppression activities on the Detwiler Fire, in a manner which does not compromise firefighter safety. The mitigations described within this plan have been developed to apply to constructed fire lines, watercourse crossings, access roads, drop points, heli-spots and any other locations disturbed by fire suppression activities. A Repair Specialist will be assigned to ensure that work is done as required and according to the Emergency Fire Suppression Repair Plan. Additional specialists or equipment may be used if the need arises. Specialists will release equipment from the area when their work is completed.

II. General Repair Guidelines

A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

B. Roads

- 1) Repair roads to pre-fire condition as requested by the Repair Specialist.
- 2) Re-establish existing berms where applicable.
- 3) Breach berms to facilitate drainage, where applicable.
- 4) Clean culverts plugged with soil and rock resulting from fire road use.
- 5) Remove all slash and debris from culvert inlets/outlets.
- 6) Blading or grading of roads may be necessary. Grading shall be done after all suppression repair work is completed for areas accessed by the roads being graded.
- 7) Where vegetative material was cut and deposited adjacent to permanent roads it shall be lopped and scattered to a depth within 30" of the soil surface.

C. Firelines; Hand and Dozer

Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using pre-fire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

Waterbar Guidelines:

- 1) Spacing: These spacing distances should be used as a guide. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install water-bars at the following recommended **minimum** intervals:

Fire line Gradient (% slope)	Minimum Distance Between Water-Bars (feet)
0 to 10	200
11 to 25	100
25+	50

- 2) Location: Locate waterbars at natural slope breaks or to take advantage of natural features when possible. Direct water to unburned areas, and/or resistant surfaces with high vegetation cover when possible. Waterbars should extend beyond the width of the trail and discharge into undisturbed areas, rocky ground, or filter areas well protected with slash and vegetative cover.
- 3) Depth and Width: Waterbars need to be cut into the ground surface; do not simply push up soil. On dozer constructed line waterbar depths should be at least 6 inches; total height from bottom of ditch to

top of waterbar should average at least 12 inches and not exceed 24 inches. On hand constructed line waterbar depths should be at least 4 inches; total height from bottom of ditch to top of water-bar should average at least 8 inches and not exceed 18 inches. The width of the waterbar channel should be enough to handle expected water flows and to avoid plugging when a normal amount of sloughing occurs.

- 4) Angle: Determine the average gradient in percent slope of the fire line being waterbarred. Add 5 to the average gradient. This approximates the angle in degrees for the water bar. Do not install water bars at an angle steeper than 45 degrees as this will increase water velocity rather than slow it down.

D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing shall be sloped back to prevent future stream bank failure.

E. Archaeological or Historic Sites (if discovered)

- 1) All sites and potential sites shall be flagged and avoided.
- 2) Impacted sites will be reported to the Suppression Repair Specialist as soon as possible.
- 3) If sites are encroached upon, work will stop immediately and the Division/Group Supervisor or Suppression Repair Specialist will be notified.

F. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)
- 3) Grade and water roads, as needed, that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations.
